Applicants' election without traverse of the apparatus invention is acknowledged. Claims 4-7 are withdrawn from further consideration.

Claims 8-~~11~~<sup>9</sup> are rejected under 35 U.S.C. § 112, first and second paragraphs, as the claimed invention is not described in such full, clear, concise and exact terms as to enable any person skilled in the art to make and use the same, and/or for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

What is a "sufficient width to accommodate means for serially cutting...", or "sufficiently large to allow a tool ... to define ... on a single machine set up"?

In claim 11, how "thin" is a "hub opening ... axially thin enough that the narrow ends of the conical elements can be directly formed together"?

These limitations are also essentially product-by-process limitations of little weight in an article claim.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. § 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --  
(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 3682

Claims 1-3 (and 8-<sup>9</sup>~~11~~, to the extent definite and understood), are rejected under 35 U.S.C. § 102(b), as being anticipated by Kim. The examiner finds all claimed subject matter to be present.

The elements involved are integral as assembled. See col. 4, lines 10-11.
